

Sanford

Underground Science and Engineering Laboratory
at Homestake

presents a free public lecture series:

Deep science for everyone

Cosmology for everyone

Dr. Hitoshi Murayama

Friday, April 25 – 7 p.m.

The Classroom Building
South Dakota School of Mines & Technology
Rapid City

Physicist Hitoshi Murayama of the Lawrence Berkeley National Laboratory has researched “particle cosmology” and “supersymmetric phenomenology,” but he also hosted a “Physics Barbecue for Kids.” He’ll explain why going deep underground can help reveal mysterious phenomenon like “neutrinos.”

Finding life where you
don't expect it

Geoscientist Tullis Onstott
Princeton University

Tuesday, April 22 – 7 p.m.

The Auditorium
Lead-Deadwood High School
320 S. Main Street, Lead

Searching for dark matter

Physicist Robert Svoboda
University of California at Davis

Thursday, April 24 – 7 p.m.

Black Hills State University
Student Union
Spearfish

Co-sponsored by:

Homestake-Adams
Research and Cultural Center
Deadwood, SD
