

Sanford

Underground Science and Engineering Laboratory
at Homestake

presents a free public lecture series:

Deep science for everyone

Searching for “dark matter”

Dr. Robert Svoboda

Thursday, April 24 – 7 p.m.

Black Hills State University
Student Union
Spearfish

Physicist Robert Svoboda of the University of California at Davis hopes to hunt for “dark matter” 4,850 feet underground in the Sanford Underground Laboratory at Homestake. Scientists think dark matter and “dark energy” comprise most of the mass of the universe. So far, no one has detected either.

Finding life where
you don't expect it

Geoscientist Tullis Onstott
Princeton University

Tuesday, April 22 – 7 p.m.

The Auditorium
Lead-Deadwood High School
320 S. Main Street, Lead

Cosmology for everyone

Physicist Hitoshi Murayama
Lawrence Berkeley National Laboratory

Friday, April 25 – 7 p.m.

The Classroom Building
South Dakota School of Mines & Technology
501 E. Saint Joseph St., Rapid City

Co-sponsored by:

Homestake-Adams
Research and Cultural Center
Deadwood, SD
